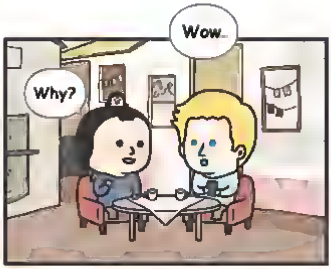
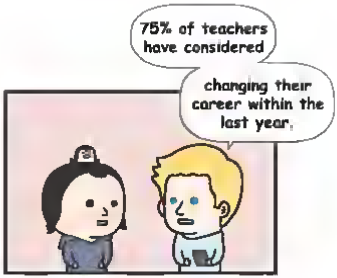
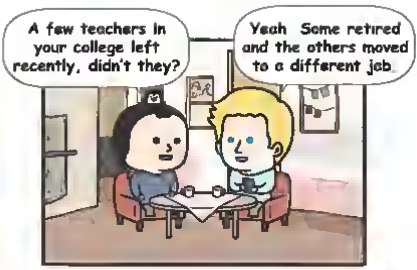
Best Occupation



Many young adults who are getting ready to step into the world worry about their future.

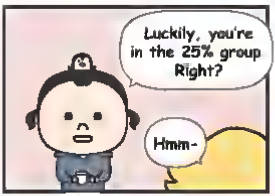


Just like them,
many adults who already have a job
still worry about their future.

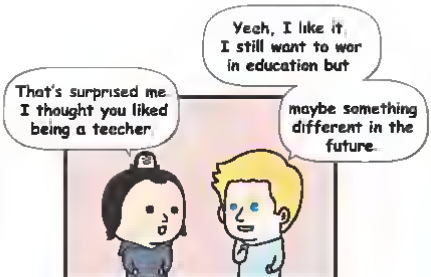


Sometimes they move onto something better.

You know that I'm always really busy. And stressed.
Is teaching really hard? I guess no job is easy.
The system causes lots of stress for teachers.

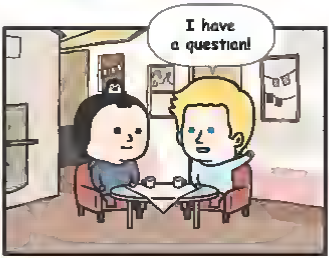


How nice it would be if everyone could find the perfect job for themselves?

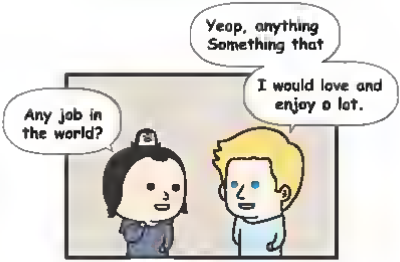


That's surprised me. I thought you liked being a teecher.
Yeah, I like it. I still want to wor in education but
maybe something different in the future.

Maybe it's not easy at all because otherwise, life would be too easy for us.



Anyway, Mev asked me.



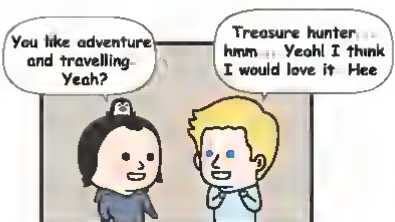
Then I fell into deep thought.

Magician? No...

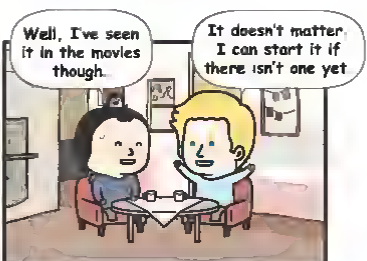
Inventor? No, no

Um... Something that he would love...

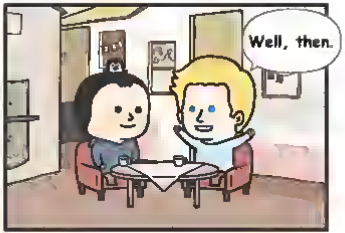
And my answer was...



Mev seemed satisfied,
and that made me think

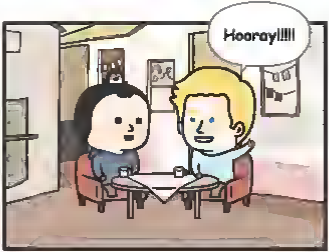


It would be wonderful if everybody could be what they want to be.

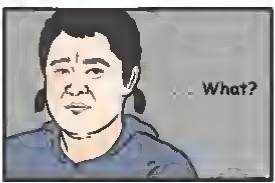


Well, then.

I need to hide some treasure first



Hooray!!!!!



. . . What?
